

MIGUEL VON A. NATIVIDAD

Fame Residences Tower 4, Mayflower Street, Barangay Highway Hills, Mandaluyong City
0956-510-1831
nmiguelvon@gmail.com

Enthusiastic and meticulous web developer excited to utilize my technical abilities and team-oriented approach to craft innovative digital solutions. I am looking for an opportunity to grow professionally, broaden my skills, and contribute to your organization's success through effective and impactful web development.

EDUCATION

OUR LADY OF SACRED HEART COLLEGE OF GUIMBA, INC. Bachelor of Science in Information and Technology	Guimba, Nueva Ecija <i>Class of 2025</i>
OUR LADY OF SACRED HEART COLLEGE OF GUIMBA, INC. Secondary Education	Guimba, Nueva Ecija <i>Class of 2018</i>

EXPERIENCE

<i>Web Associate / Graphics</i>	June 2025 - April 2026
HYUNDAI / FOTON QUEZON AVENUE (<i>owned ESJAY and MANINDRA Auto Corp</i>)	

Duties and Responsibilities:

- Designed and developed websites for Esjay Auto Corp. (EAC) and Manindra Auto Corp. (MAC).
- Created visually appealing web pages that are aligned with brand guidelines.
- Ensured website content is current, accurate, and relevant by updating text, images, videos, and other media.
- Assisted in video/photo editing required for social media content and other marketing collateral.
- Collaborated with the creative/marketing team in producing enticing and functional content.
- Aid in distributor’s standard facility requirements.
- Stayed updated, keeping abreast of the latest website designs, trends, technologists, and best practices.
- Contributed to the overall design strategy of the company.
- Worked closely with the marketing and content teams to ensure alignment with overall brand messaging and campaigns.
- Maintained brand consistency across all digital platforms.
- Maintained security measures to protect the corporate website from attacks and malware, including but not limited to:
 1. Regularly updated website software and plug-ins.
 2. Implemented strong password policies and user authentication measures.
 3. Monitoring website activity for suspicious behavior.
 4. Regularly backing up website data.
- Monitored website responses and inquiries through various channels.
- Responded to inquiries in a timely and professional manner, or escalated to appropriate team members as needed.
- Responsible for designing, developing, testing, and deploying mobile applications, ensuring a seamless user experience, security, and ongoing maintenance and updates. Collaborated with stakeholders and team members to deliver high-quality, functional, and user-friendly apps.

<i>Intern (Service Department)</i>	February to May 2025
HYUNDAI QUEZON AVENUE (<i>owned ESJAY Auto Corp</i>)	

- Encoded all service appointments from the years 2023 – 2025 and filed organized.
- Developed an online service appointment and scheduled a test drive.
- Checked vehicle parts covered under client warranties using the Hyundai Motor Philippines (HMPH) system.

PROJECTS

Hyundai Quezon Avenue Website | PHP / SQL / API / CSS / Bootstrap / JavaScript / Photoshop

(The Hyundai Quezon Avenue website is a modern, user-friendly platform designed to provide visitors with easy access to schedule test drives, request service appointments, and obtain information about Hyundai vehicles, services, and promotions.) <https://hyundaiquezonavenue.com/>

Foton Quezon Avenue Website | PHP / SQL / API / CSS / Bootstrap / JavaScript / Photoshop

(The Foton Quezon Avenue website is a modern, user-friendly platform designed to provide visitors with easy access to schedule test drives, request service appointments, and obtain information about Foton vehicles, services, and promotions.) <https://fotonquezonavenue.com/>

Checklist Mobile App | Flutter / Dart / SQL / C++ / Photoshop

(Designed to help users easily monitor and inspect their vehicles before proceeding to maintenance. It provides a user-friendly interface to perform thorough checks on essential vehicle components, ensuring all necessary maintenance points are reviewed and recorded for safety and optimal performance.) https://github.com/AsKm3wHy/esjay_check

Photobooth Online Reservation | PHP / SQL / API / CSS / Bootstrap / JavaScript

(It is web-based system that allows users to book and manage photobooth services easily. It streamlines the reservation process, enabling clients to select dates, view availability, and secure their booking online for events and parties.) <https://rommelgarcia.com/>

Event Tabulation | PHP / SQL / CSS / JavaScript

(This project was developed during my third year of college. It is used for events such as dance competitions, pageants, and other similar events. The system simplifies and speeds up the scoring process, making it easier and faster for judges to compute scores accurately.) <https://github.com/AsKm3wHy/ETS>

Workify | PHP / SQL / API / CSS / HTML /Bootstrap / JavaScript

(This project was our final capstone during my fourth year of college. Workify is an online platform that helps schools select appropriate workplaces for students, improving communication and ensuring placements meet students' needs.) https://github.com/JASHiNSENNiN/special_project_21

Kiosk OLSHCO visitor | .NET / C# / SQL / Photoshop

(Kiosk OLSHCO Visitor is a system developed with .NET, C#, and SQL to efficiently manage visitor check-ins and check-outs at OLSHCO, streamlining visitor tracking and security.) <https://github.com/AsKm3wHy/OLSHCO>

Smart Gate Lock System (features: Face recognition, Fingerprint sensor, Remote, RFID) | Arduino / C++ / C

(The Smart Gate Lock System uses Arduino with C++ and C, featuring face recognition, fingerprint sensor, RFID, and remote access for secure and convenient gate control.) <https://github.com/AsKm3wHy/Smart-Gate-Lock-System>

SKILLS

- Proficiency in Laravel, PHP, Dart, Java, Python, C++, C#, C, JavaScript, or Node.js.
- Experienced in database management systems such as MySQL and RESTful API integration for backend development. Skilled in designing, implementing, and maintaining scalable and efficient backend solutions to support web and mobile applications.
- Familiarity with version control systems like Git and Github.
- Familiarity with network configuration and administration using Cisco.
- Proficiency in front-end development and responsive design using HTML, CSS, Bootstrap, and Tailwind.
- Knowledge of backup and recovery procedures and database security measures.
- Knowledge of graphic creation using Photoshop, Illustrator and Canva.
- Proficiency in email setup, creation, troubleshooting, and ensuring secure and reliable email communication.
- Proficiency in managing Domain Name System (DNS) settings, including configuring DNS records, troubleshooting DNS issues, and optimizing domain resolution for websites and services.
- Proficiency in utilizing Visual Studio Code for efficient coding, debugging, and project management. Adept at working collaboratively in team environments, following best practices, and continuously learning new technologies to deliver high-quality web solutions.
- Additional experience in mobile app development using Flutter, with a focus on user-friendliness.

- Experienced operating DSLR cameras to capture high-quality images at various events, ensuring excellent composition and lighting.
- Knowledge with technical support for hardware, software, and network support.
- Experience in installing OS, network security, and troubleshooting hardware peripherals.
- Knowledge of providing technical support for hardware, software, and network issues.
